

Rudy Leatherman incorporated combustion testing as a part of his private residential/commercial HVAC Company in 1980.

For over 16 years he was responsible for combustion testing, evaluating, installing and troubleshooting a wide variety of commercial, industrial and residential HVAC systems.

His involvement also included educational development and training for thousands of mechanical contractors, home inspectors, energy auditors, utility company personnel, code officials, maintenance technicians, plant/boiler technicians, fire departments, and others.

For the past twelve years, Rudy has conducted residential, commercial and industrial combustion and carbon monoxide training with Bacharach's Institute of Technical Training. He also works closely with Bacharach's Customer Service Representatives to provide technical assistance for customers with application related concerns.

He also maintains Bacharach's application related web page at www.bacharach-training.com.
